award**

iF International Forum Design Award

An internationally renowned design award since 1953. It is held at iF International Forum Design GmbH in Hannover, Germany. Products whose aesthetics, functionality, and innovativeness have been strictly examined and recognized by design experts.

Green Good Design Award

Hosted by American Chicago Athenaeum Architectural Design and European Architecture Design City Research Center in Ireland. A global environmental award that began in 2009 with the aim of reforming awareness through sustainable design.

Life Anew

To create a culture
of comfortable,
healthy living.

TOTO Technology

WATER SAVING

Toilet works with equal or less than 4.8L flush.

TORNADO FLUSH

Instead of letting water pour down from the rim as a traditional flush, the Tornado Flush projects powerful jets of water from the inside of the bowl and creates a whirlpool effect that cleans the entire bowl surface.

RIMLESS

TOTO toilet bowls' rimless design helps ensure that dirt and bacteria aren't able to collect in the first place.

CEFIONTECT

CEFIONTECT is a glaze applied to the ceramic surface, leaving them with a long-lasting finish that prevents the build-up of mould, limescale and waste matters.

LINEARCERAM

LINEARCERAM's thin design harmonizes with any space. Although eye-catchingly thin, it is also extremely strong.

ZERO DIMENSION

Brings freedom from gravity, releasing stress on joints and encouraging ultimate relaxation.

RECLINE COMFORT

Nestled in comfort, feel your body and mind release into a state of tranquility.

HYDROHANDS

Introduces the benefits of hydrotherapy massage into a bath. By flowing through specially high-pressure and high-precision nozzles, the water's own pressure causes a spiraling, therapeutic motion.

* Above technologies do not apply to all TOTO products, please refer to product specifications for details

TOILET

TORNADO FLUSH

CLEAN SYNERGY

The combination of our proven toilet technologies takes care for reliable cleanliness. For waste and bacteria, it is more difficult to accumulate.

CEFIONTECT

RIMLESS

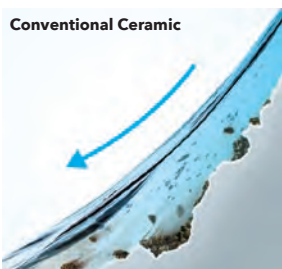

Toilet Technologies

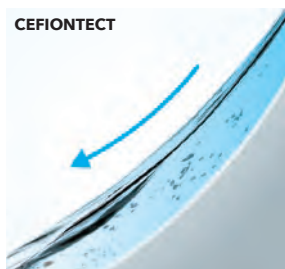

CEFIONTECT

Ultra-smooth ceramic leaves nowhere for waste to cling.

CEFIONTECT is an ultra-smooth ceramic glaze that coats the toilet bowl. Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

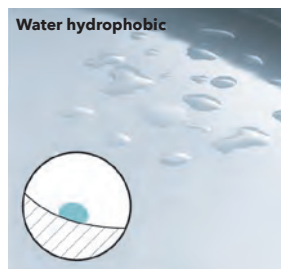

Conventional Ceramic

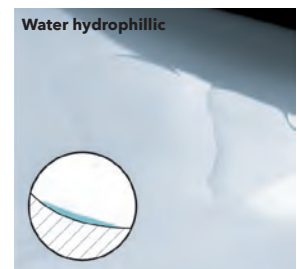

CEFIONTECT

Conventional ceramic may appear perfectly smooth to the eyes, but has gaps where waste, mold and bacteria hide. At just one millionth of a millimeter, CEFIONTECT's surface ridges are much tinier than waste particles.

Water hydrophobic

Water hydrophillic

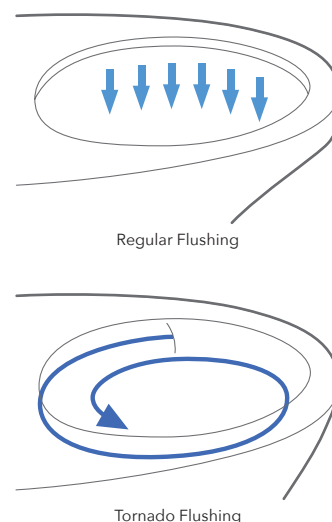

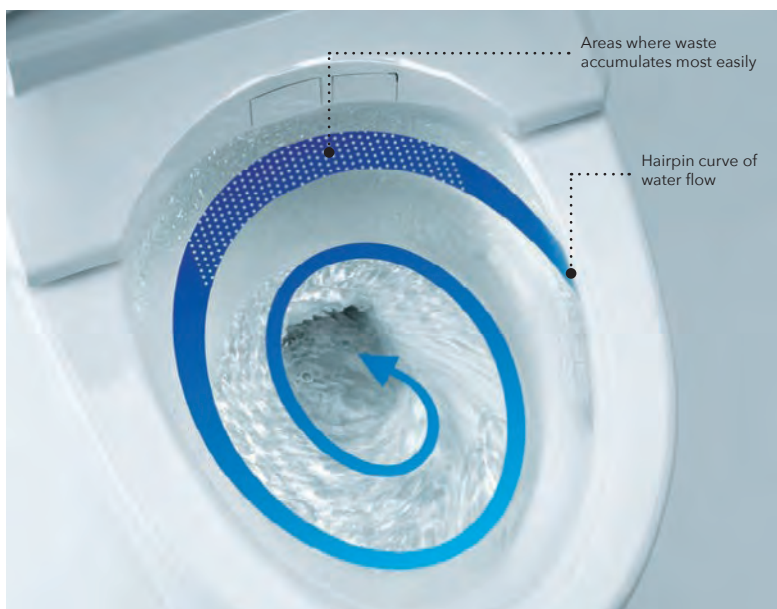

Hydrophilic describes organisms and materials that attract water. CEFIONTECT is hydrophilic. Water spreads easily over the toilet bowl, so waste particles easily wash away.

TORNADO FLUSH

360° cleaning power reaches every spot using less water.

TORNADO FLUSH reaches every inch of the toilet bowl - all the way to the edge. The water is propelled into the bowl, creating a whirlpool that harnesses the power of the water for thorough cleaning. TORNADO FLUSH not only cleans more effectively, it does so quietly using less water.

Powerful washing where waste accumulates most easily

TORNADO FLUSH's dynamic waterjet discharges from near the front of the toilet bowl, travels in a narrow channel along a hairpin curve, and with sustained water pressure thoroughly cleans the areas where waste accumulates most easily - and then washes the entire bowl. Exquisitely high-quality ceramic makes this innovative design possible.

RIMLESS

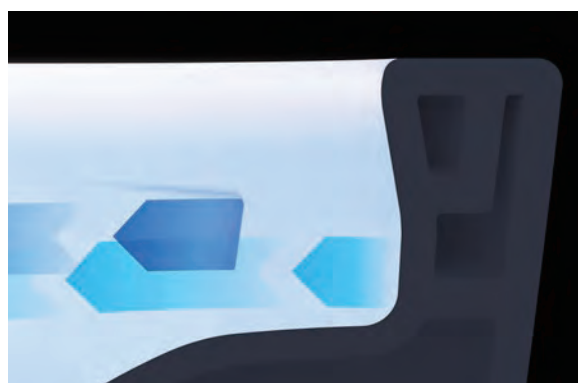

Leaves no place for waste and germs to hide.

The unique RIMLESS design not only leaves no place for waste and germs to hide. It also makes for a much easier to clean toilet.

With TORNADO FLUSH and CEFIONTECT glaze, the clean synergy technologies offer a sustainable way to maintain sanitary conditions inside your toilet. Since waste does not accumulate and create stains, there is less need for manual cleaning with detergents.

Easier to clean, minimises the need for toilet cleaner.

Ceramic toilet bowl without hard-to-reach areas along the top edge.

LAVATORY

Material Technologies

LINEARCERAM

Exquisitely thin is the next dimension of beauty.

LINEARCERAM's thin design harmonizes with any space. Although eye-catchingly thin, it is also extremely strong. Sophisticated and inviting to use, LINEARCERAM is a new paradigm in bathroom aesthetics. To create a vessel of such exquisite thinness, TOTO developed an advanced form of proprietary ceramic.

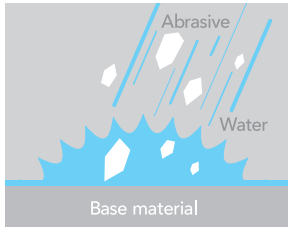

Along the thinnest part of the ridge, LINEARCERAM is approximately half the depth of a conventional basin. At the same time, the material has almost twice the tensile strength.

CLEAN MATTE

An elegant texture you'll want to touch.

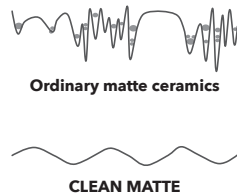

We achieved a smooth texture that had been impossible with ordinary matte ceramics, while at the same time enhancing the design to give off a gentle, silky light, unlike ordinary gloss ceramics.

About CLEAN MATTE technology

Compressed air is used to blast the glaze-covered surface of the ceramic with a slurry of water and abrasive – an advanced technology that enables microscale processing.

Ordinary matte ceramics have a jagged surface that tends to retain dirt. CLEAN MATTE achieves uniform, micro-level undulations for a smoother surface that makes dirt removal easier while also improving design.

A matte finish with outstanding cleanability

Ordinary matte ceramics have a reputation for hanging on to dirt, but the unique way CLEAN MATTE ceramics from TOTO are processed means that any clinging dirt can easily be washed away.

CEFIONTECT

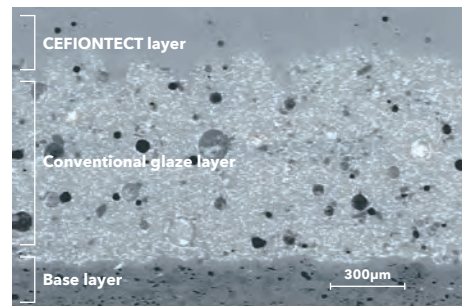

Special hygienic glaze.

CEFIONTECT is an ultra-smooth ceramic glaze that coats the lavatory. Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. The CEFIONTECT glaze is especially durable, keeping the ceramic surface clean and beautiful for years to come.

For easy cleanliness

The CEFIONTECT glaze is fired into the ceramic during the production process, creating a very durable, long-lasting surface.

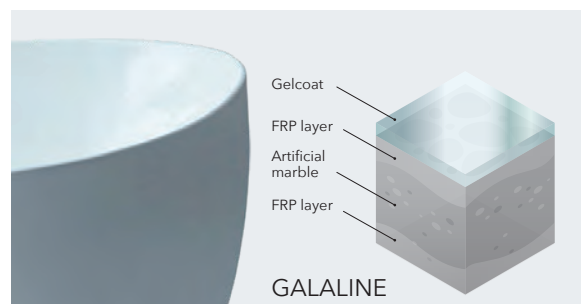

What makes CEFIONTECT so durable?

Glass layers are burned onto conventional glaze, making CEFIONTECT extremely durable.

GALALINE

Remarkably durable material.

Offering outstanding durability, the sanitary ware is made of GALALINE artificial marble and constructed using TOTO's innovative sandwich configuration.

BATH TUB

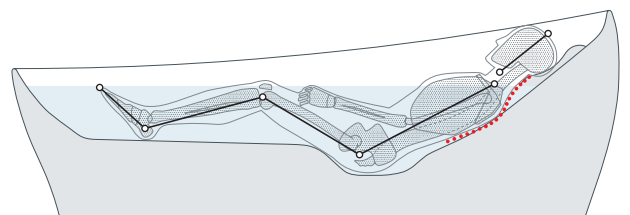

ZERO DIMENSION

Afloat, calm, immersed in the meditative moment of relaxation.

The posture of an astronaut resting in space

ZERO DIMENSION bathing brings freedom from gravity, releasing stress on joints and encouraging ultimate relaxation.

The brain in a state of tranquility

Research has shown that the ZERO DIMENSION bathing posture reduces activity in the part of the brain that houses the language function. This is the reason ZERO DIMENSION bathing feels calming and relaxing.

A woman is shown from the waist up, floating in a hydrotherapy pod. She is wearing a black strapless top and black shorts. Water is spraying from nozzles above her head, and she is surrounded by bubbling water. The pod is oval-shaped and has a metallic, reflective interior. The background is dark.

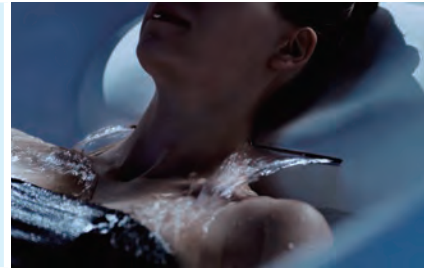

Absolute Relaxation Experience

FLOTATION TUB

Exclusive features make every bath a luxurious occasion.

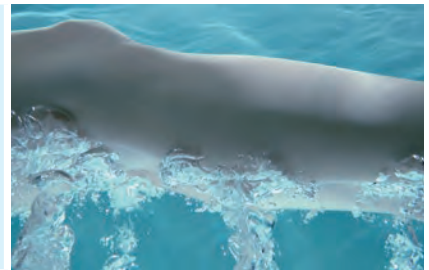

NECK BATH

With variable pillow positions ensuring stability, people of all body shapes can enjoy warm bathing above the shoulders to the neck.

AIR-JET

Fluctuating streams of air bubbles rise from below and envelop the body with a soothing sensation.

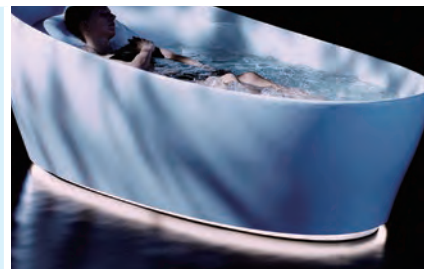

CONTROLLER

The electrostatic CONTROLLER is operated by the slightest touch.

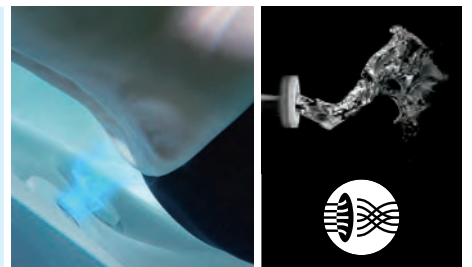

LED LIGHTING

In the outer perimeter of the tub's base, LED LIGHTING supplies a dream-like ambience.

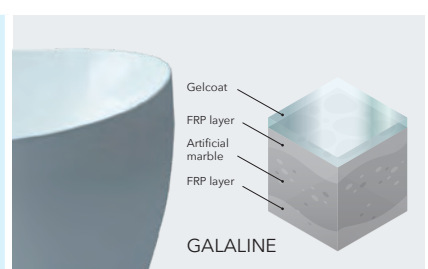

HYDROHANDS

The integrated HYDROHANDS technology uses special calibrated jets to create a spiralling, therapeutic motion in the water – for a new type of massage. This dynamic, multidimensional whirlpool effect reaches and relaxes even deep muscle groups, allowing for a full back massage similar to ones done by hand.

GALALINE

Offering outstanding durability, the tub is made of GALALINE artificial marble and constructed using TOTO's innovative sandwich configuration.

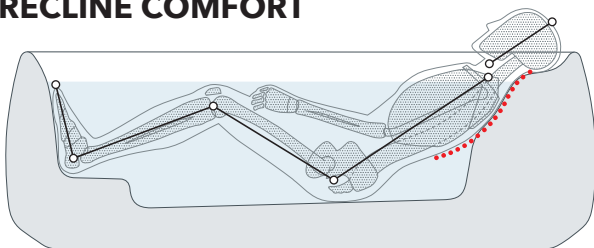

RECLINE COMFORT

Nestled in comfort, feel your body and mind release into a state of tranquility.

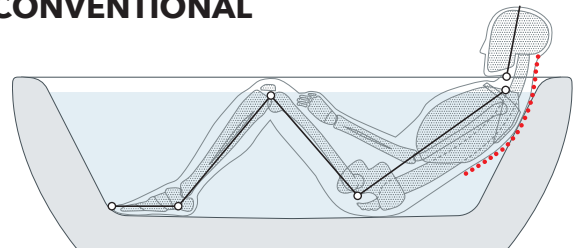

RECLINE COMFORT

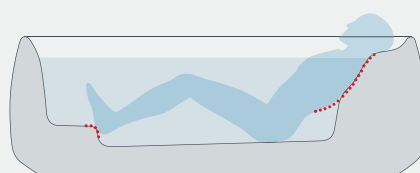

The weight of the head releases onto the headrest, the body receives the sensation of a comforting embrace. The natural S-curve of the spine is maintained all along the neck and down the back, encouraging deep release. This position provides a deep sensation of ease and tranquility. It is a bathing experience that brings relaxation beyond expectations.

CONVENTIONAL

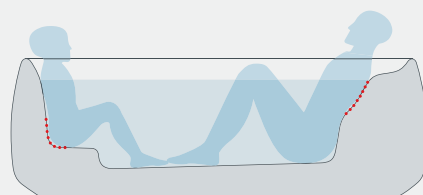

In a conventional bathtub, the low water height and a rounded low back make complete relaxation difficult to attain. The shoulder and neck area do not receive warmth from soaking and the bathing position can feel tight and cramped.

Step design

It allows people of short stature to enter the bathtub more stably and safely.

A face-to-face parent-child bath can be achieved.

PJJYD2200PWEH#GW

Galaline Free-Standing Air Bubble & Whirlpool Bathtub
